TECHNICAL SKILLS

- **Languages:** Typescript, JavaScript (ES6+), C++, Python, HTML/CSS
 - **Frontend Frameworks:** Next.js 14+, React.js, React Router v6, React Query, Redux Toolkit, Tailwind CSS
 - **Backend & Cloud:** Supabase, PostgreSQL, RESTful APIs
 - **Build & DevOps:** Git, GitHub Actions, Vite, Netlify, Vercel
-

EXPERIENCE

Frontend Developer (Part-Time)

May '26 – Present

SForger

- Developed reusable, responsive UI components for a production-grade web application.
- Integrated APIs and collaborated with cross-functional teams to deliver scalable, accessible features.
- Improved application performance, fixed bugs, and enhanced maintainability through reusable architecture and collaborative development.

Frontend Developer Intern

Nov '25 – Apr '26

Flickerlink Technologies (OPC) Private Limited

- Developed responsive frontend features and optimized application performance, reducing load times through efficient rendering techniques.
 - Built interactive user interfaces with API integrations and created real-time analytics dashboards featuring live data updates for enterprise users.
-

PROJECT

Counsel AI

Next.js, React.js, TypeScript, Tailwind CSS,

Supabase

Live : [counsel-ai-kappa.vercel.app](#)

- Built a responsive, component-based frontend using Next.js, React.js, TypeScript, Tailwind CSS, and Shadcn UI.
- Integrated LLM APIs and Supabase Authentication to enable AI-powered legal document analysis, secure authentication, and real-time data management.
- Implemented client-side document upload and processing workflows for PDF and DOCX files, generating AI-assisted summaries and legal insights.

Artisan Cafe Platform

Next.js 14, Supabase, Tailwind CSS

Live: [cafe-site-five.vercel.app](#)

- Designed and developed a production-ready specialty cafe web application utilizing Next.js 14 server components to maximize SEO ranking and significantly accelerate initial page load speeds.
- Integrated a highly secure Supabase backend architecture (PostgreSQL, Auth) to facilitate real-time menu modifications and handle persistent user order workflows.
- Built a comprehensive, role-based administrative dashboard enabling business owners to seamlessly track incoming orders and manage dynamic inventory states.

Horizon Stay - Hospitality Management Dashboard

React.js, React Query, Supabase, Styled

Components

Live: [horizon-stay.vercel.app](#)

- Architected a comprehensive internal management dashboard for hotel administration, featuring secure JWT-based user authentication and real-time data persistence utilizing a Supabase PostgreSQL backend.
 - Optimized client-side state mapping and asynchronous API interactions with React Query, implementing aggressive cache invalidation strategies to drastically reduce redundant network requests and eliminate UI lag.
 - Engineered complex, multi-step booking reservation workflows using React Hook Form, and integrated interactive data visualizations via Recharts to allow stakeholders to analyze historical revenue and occupancy
-

EDUCATION

B.Tech in Electronics and Communication Engineering

National Institute of Technology, Srinagar – *Dec 2020 - Jul 2024*
Class XII (CBSE) – Army Public School Ratnuchak, Jammu – *2020*
Class X (CBSE) – Army Public School Ratnuchak, Jammu – *2018*

CGPA: 7.3
89.2%
88.0%
